Professional Experience

Meta | Senior Product Manager | [remote] Fort Collins, CO | 2023 – Present

Managed products across Oculus Virtual Reality devices, Global consumer experiences on Messenger, Facebook Events, and Community Integrity with +8 total years at Meta.

- Improved the user experience for millions of global users on Messenger to ensure a seamless photo and video sending flow. Increased user media sending on Messenger by percentages previously not reached within the company.
- Led a cross-organizational initiative of thousands of engineers that materially reduced Oculus device crash rates and improved user stability.
- Ensured all data delivery on Oculus devices was fast and accurate for internal and external investor reporting. Set product direction for data delivery services; telemetry, diagnostics, crash reporting, and bug reporting systems across the VR platform.

Product Management Consultant | Fort Collins, CO| 2020 – 2023

- Started an independent Product Management Consulting practice with startups and local universities needing product and business management guidance. Consulted with startups on marketing for their brands and product design.

Meta (Facebook) | Product Manager | Menlo Park, CA | 2015 – 2020

- Launched Event Insights for Creators, increasing event ad creation by 10% and served a key need to see their attendee data in a consolidated dashboard.
- Drove end-to-end delivery of Multi-Occurrence Events (a key user ask for many years), exceeding inventory goals and scaling adoption for large creators serving 12M+ daily active users.
- Influenced multiple senior leaders on a strategic metric redesign; shifting focus from raw inventory to creator engagement.
- Built an experimental product that utilized machine learning to proactively detect and assist users when they were in need of customer support.

TuneIn | Senior Product Manager | Palo Alto, CA | 2013 – 2014

- Owned product vision and roadmap for TuneIn, TuneIn Pro, and OpenMic on iOS and for the Content Discovery Feed.
- Led major redesigns and rapid iteration cycles across consumer audio products.

StumbleUpon | Ads & Content Quality Team Manager | San Francisco, CA | 2011 – 2013

- Led a team focused on preserving the user experience and integrity of the platform. Managed personal growth of multiple employees.
- Developed platform policies, using data driven decision making, to quickly remove prohibited content.

Google | Project Manager | Mountain View, CA | 2006 – 2011

- Led automated fraud and compromised account detection initiatives at global scale utilizing machine learning and data driven assessments.
- Influenced engineering and operations leadership to invest in anti-fraud and spam technology.
- Managed project deadlines for flawless execution across multiple XFN design and engineering teams.

Education

University of Michigan B.A. Dual Major: Communications & Sociology

- Led +10 students to volunteer at homeless shelters across Ann Arbor & Detroit, MI.
- Taught an undergraduate class on sociology and media representation. Led group discussions on required reading.
